avigilon™

Trusted Security Solutions™ for Education

Avigilon designs, develops, and manufactures video analytics, network video management software and hardware, surveillance cameras, and access control solutions.

How We Can Help Protect Schools

Our complete security solutions have been selected by numerous schools and universities worldwide. Our unique portfolio of surveillance and access control solutions help protect what's most valuable.

Real-time Notification — Self-learning video analytics provide alerts to help detect people or vehicles in areas of interest, improving response times in active situations.

Powerful Search — Avigilon Control Center (ACC) video management software with Avigilon Appearance Search™ technology sorts through hours of footage with ease to quickly locate a specific person or vehicle of interest across an entire site. ACC™ software enables you to build robust video evidence, and create a powerful narrative of events in a single export file to improve forensic investigations.

Efficient Bandwidth Management — Avigilon's High Definition Stream Management (HDSM)™ and Avigilon's HDSM SmartCodec™ technologies work together to significantly reduce bandwidth and storage needs, while maintaining image quality.

System Interoperability — New enhancements in the ACC software allow the system to use Access Control Manager (ACM) generated door events to create rule-based actions and notifications for quick onsite responses.

Easy Integration — Avigilon solutions are built on an open platform, allowing you to leverage previous 3rd party investments that are ONVIF® compliant.

Why Avigilon?

- Designed and manufactured in North America with a commitment to quality.
- 24/7 technical support by phone or online chat.
- Complimentary software training through online and instructor-led courses.

Avigilon Solutions for Education

Avigilon H4 cameras allow your system to maintain optimal performance while providing exceptional image detail. Available in resolutions from 1 MP to 30 MP (7K).

ACC Edge Solution Analytics Appliance adds our self-learning video analytics to your existing IP cameras, protecting your current investments. You can now record locally, monitor centrally and manage remotely with our all-in-one device.

Avigilon analog video encoders are a cost-effective way to easily migrate your legacy analog system to a network-based IP-system for true cost savings.

Access Control Manager (ACM) is a browser-based access control solution that allows you to respond immediately to alerts and record student attendance during school fieldtrips, routine security drills and emergency evacuations wherever you are using the ACM Verify™ Browser.
